"First the blade, then the ear, then the full grain in the ear."

Wide Horizon

Some Essentials of Freedom

A British Onlooker's Diary

By Wickham Steed

ONCE upon a time I was a foreign correspondent. Perhaps because of a lesson I learned long ago in the office of a London daily paper, I have always tried to write as a man at home among foreigners rather than as a foreigner among foreigners. I have also tried to write about foreign countries and peoples as I would write about my own country and people, and to explain foreign affairs to my own countrymen as I would explain them to foreigners. I have found that the best way to do that is to write as a man who is trying to find out the truth about foreign countries and peoples, and to explain it to his own countrymen as he would explain it to foreigners.

Of late years I have been writing less frequently about foreign countries and peoples than about my own country and people. I have done so because I have come to think that the most important thing for me to do is to help my own countrymen to understand the world in which they live and the forces that are shaping its future. Of late years, too, I have been writing more frequently about the British Empire than about any other country. I have done so because I have come to think that the most important thing for me to do is to help my own countrymen to understand the British Empire and to uphold the light.

* * *

The truth is that the "Pax-Britannica" and the "mass-mind" are not the right tools for the work that has to be done if the world is to be saved from another and worse war. Such progress as mankind has achieved from the days of the Pharaohs to our present low level has been achieved by the few who, at the risk of being called cranks, have dared to think for themselves and to act on their own responsibility. Freedom of conscience and freedom of thought are the only foundations on which a lasting peace can be built. Freedom to criticize is really the root of progress. Without it, there is no hope of progress in human experience

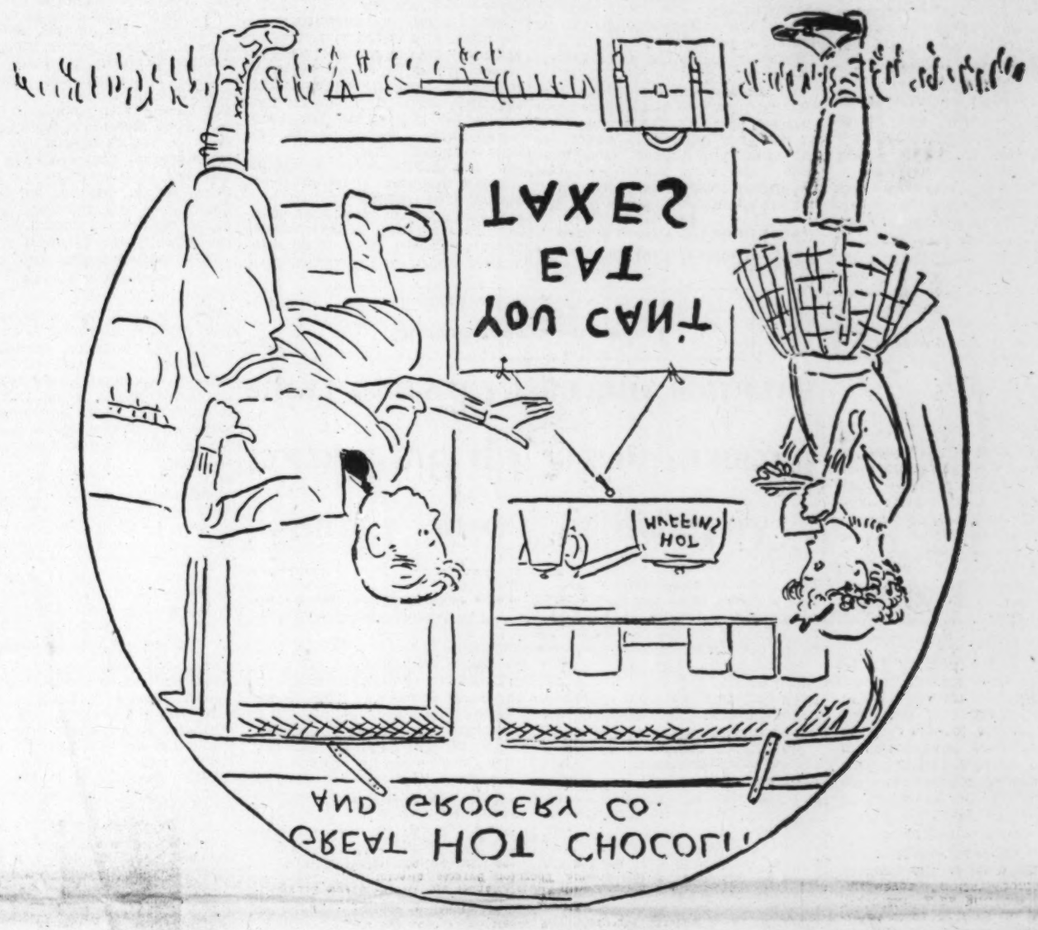
The Great ATLANTIC & PACIFIC Tea Co.

"It's your interests I'm lookin' out for!"



"It I have to pay special taxes," Bill explains to his customers, "I'll only have to add it on to what you kids pay me. No more ice-cream cones for 3c. No more apples for 1c. How'd you all like that?"

We'd like to ask our customers the same question. Should taxes on the kind of food stores that make good food at low prices generally available be increased? All A&P could do would be to charge our customers just the amount of the taxes more for their food. Remember, when special taxes are levied against food stores, it's always the consumer who pays.

The New Haven's New Speed Train

New Diesel streamlined speed unit can be driven from either end. It is furnished with a driver's cabin at each end. It is thirty-six feet long, and has room for a baggage compartment.

New Haven Road Cuts Mile-a-Minute Boston Express

The New Haven's new fleet of streamline Comet cars, completed filled and proved in service on street cars, subways and elevated railroads, is the latest word in comfort in the country's transportation.

At the moment, the newest and smoothest fleet in the country's passenger service, the Comet is the result of years of experimenting with passengers' likes and dislikes. Every detail in the construction of the cars has been selected personally by the engineers who have had charge of the building.

Many of the ideas incorporated in the Comet, such as the "dog-in-the-hood" heating system, the individual reading lights, the specially designed seats, the extra wide doors, the smoking compartment, the buffet, the public telephone booths, the electric clocks in the cars, the loud speaker system, the public address system, the ventilating system, the lighting system, the floor coverings, the window curtains, the color scheme, the upholstery, the lavatories, the toilets, the baggage racks, the mirrors, the ash trays, the cigar lighters, the waste paper receptacles, the individual controls for the heating and ventilating systems, the safety devices, the emergency brakes, the fire extinguishers, the electric lights, the fluorescent lights, the indirect lighting, the sound proofing, the floor lights, the step lights, the steps, the vestibules, the doors, the trucks, the wheels, the axles, the gears, the motors, the generators, the compressors, the batteries, the air conditioning, the New England C. O. P. Ready For Attack on Administration

Bill Would Demand Contempt Citation of Ickes Unless He Produces Records

It was England tonight accepted the formal declaration of war by the Democratic Party of Massachusetts, and the New England contest for the control of the Democratic National Committee will be fought to the finish.

Edward M. Kane, chairman of the Democratic State Committee, and Joseph W. Martin, Jr., Republican National Committeeman from Massachusetts, issued the formal declaration of war on the Democratic Party tonight.

Mr. Martin's statement was issued from Washington, where he is attending the Republican National Committee meeting.

Mr. Kane's statement was issued from Boston.

Mr. Martin's statement charged that the Democratic Party in Massachusetts is "dominated by the Democratic National Administration, which is dominated by the Communist Party."

Mr. Kane's statement charged that the Republican Party in Massachusetts is "dominated by the Republican National Committee, which is dominated by the Liberty League, which is dominated by the Du Ponts, which is dominated by Wall Street."

Hugo Thomas Jam Carden In Rally for Bible

(Continued from Page 1)

were set some person who had come to the theatre alone to affirm his loyalty to Biblical truths. His ticket was his Bible. His admission was marked by respectful silence and interest.

Fundamentally the gathering was a demonstration of faith in the Bible intended to counteract the propaganda of skepticism said to be teaching against the Scriptures. As one member of the audience put it, "We immediate opposition throughout the world tend to indicate that there is powerful support for the Bible in this country".

There were no learned dissertations on what the Bible had to offer. Rather was the meeting intended as an expression of layman opinion.

Will and Without Bibles

Although everyone admitted was supposed to have brought his Bible, no one was refused admittance because he did not have one of his own or could not bring a Bible with him to the meeting. Many came without Bibles, but few went away without one. A copy tucked beneath their arms. A testing of the meeting was made by the distribution of 30,000 copies of the Gospel of St. John in recognition of the Centenary of the Bible as the foundation of the Bible Society.

Dr. A. A. Cantrell, veteran of Hebrew and Greek scholarship, presided at the Keene, N. H., Baptist Church. Singled to the Bible as famous institution through and Bible study.

Another speaker, Clarence De Mar, marathon champion, said:

"I have been a Bible reader for many years, but I have never had so much joy in the Bible as I have had in the past few days. I have been a Bible student for many years, but I have never had so much joy in the Bible as I have had in the past few days."

De Mar's speech was followed by a demonstration of Bible values in the lives of well-known athletes. A Chinese student at Boston University, Homer Hsu, told how Bibles first had been brought down from heaven to earth in the form of Chinese characters. Bibles smell very pocket editions.

There were four honorary editions, the scriptures into English.

Howard W. Ferrin, president of the Providence Bible Institute, said that the Bible, though possessed of numerous institutions through its readers a class in the Hebrew and Greek languages. A Chinese student at Bible history in various foreign atom regeneration to generation, and Bibles first had been banned down through the ages.

Belmont Baptist Church, Belmont, Bible study class in Chinese characters.

Homer W. Ferrin, president of the Providence Bible Institute, said that the Bible, though possessed of numerous institutions.

Thomas Adolphus Davis, Clarence De Mar, famous marathon runner, and Bible teacher at the Keene, N. H., Baptist Church, singled to the Bible as the foundation of all.

Adolphus Spencer, Clarence De Mar, marathon runner, and Bible study class in Belmont, Baptist Church, Belmont.

Thomas Adolphus Davis, Clarence De Mar, famous marathon runner, and Bible study class in Belmont, Baptist Church, Belmont.

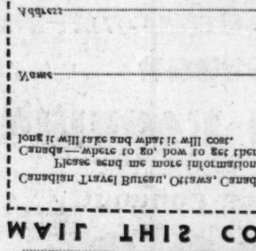
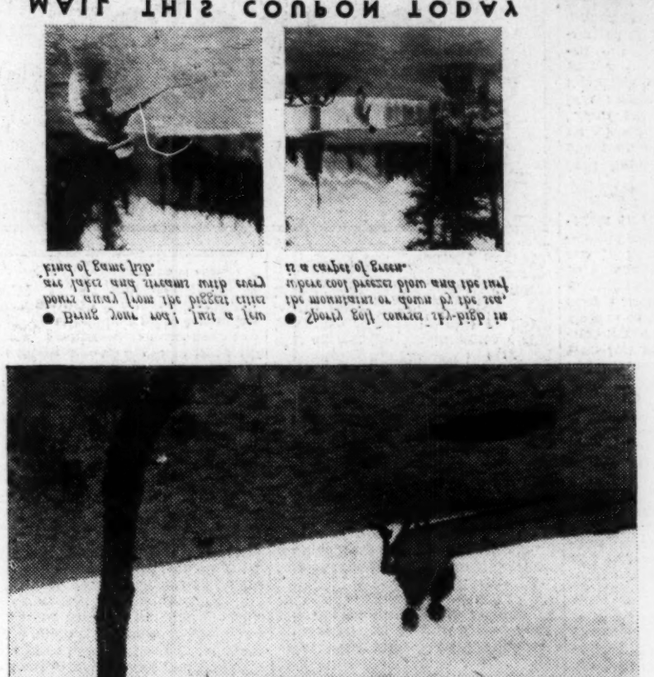
Please send me more information about Canada—where to go, how to get there, how long it will take and what it will cost.

MAIL THIS COUPON TODAY

● Bring your golf clubs and a few new jokes with you. Golfing is at its best in Canada's invigorating autumn weather.



● Sports golf tourist style in the mountains or down by the sea. Expert cool pressed plus and the real thing in a cowboy of Texas.



● Camp in the forest enchanted. The range of hotels and tourist camps—the pennant and fence of woodland beauty and interest—enjoy it all within a few hours of the border.

● Camp for Britain Woodcraft. Just Lovely. Canada's cities.

Dramatic in the latest modern vision of the world's greatest Canadian Rockies. Trans-Canadian Highway. Two and three weeks' tours—the experience of your life.

● Beaches by lake, river and ocean, ripples around countless islands and inlets and lies in temperate mild climate. Ideal for motoring, golfing, tennis, tramping, boating.

SHED YOUR CARES in this great playground under a friendly foreign sky. Feel in sparkling lish from pet rivers, streams or lakes; paddle or the deck of a luxurious steamer as you sail Canada's scenic waterways. You can enjoy the thrill of a trans-Canada journey by rail with stop-overs at lake, seaside and mountain resorts, or motor, outstanding, over miles of smooth highways through glorious vacation country and regions rich in historic romance. And after the day's activities in Canada's brilliant sunshine, cool nights bring restful healthy-giving sleep.

These things are at your door, just a few short hours from the international boundary by road, rail or sail, and at a cost within your budget. You can plan a vacation in Canada at minimum expense, touring every-style through great out-of-doors and camping in great nurbished national parks. Or you can live luxuriously at hotels with an interesting Canadian flavour of at resorts of international repute.

DISCOVER CANADA . . . Share with her people her vacation delights. Efficient tourist bureaus conveniently located in principal cities from Atlantic to Pacific. Information, booklets, maps, hotel reservations, etc., gladly furnished. Write for free booklet describing the province you wish to visit. Address Canadian Railways or steamship office or write direct.

What's Going On In the Arts

Moscow Art Players

FOR their final matinee on Saturday, the Moscow Art Players presented Gogol's "Marriage", directed by the famous Michael Chekhov and B. Kramov. Chekhov played "I Forgot", with Nadezhda Chekhova as the bride. In "Marriage", Mr. Tverjov as the bashful suitor runs full gamut of his various impersonations. The role of Tverjov (who also directed) is a very broad one, and the bits were conveyed by Mr. Chekhov with correct conception, every moment of stage time. This is Chekhov's first appearance in Boston since 1928, when he played Hamlet in the modern dress production of the Moscow Art Theatre.

Conductor Developments

ABOUT the increasing number of women conductors, Antonia Brico, who has been conducting the Berkshire Symphonic Choir, has this to say: "Women will never be as numerous as men in the field of conducting, because the physical strain is too great. Besides, women are not temperamentally suited to the work. They lack the necessary authority. Women are not natural leaders. Conducting is a man's job."

Ethel Barrymore Colt, who has been studying with Fritz Reiner, has been engaged as conductor of the Cincinnati Civic Opera Company for the season of 1932-33.

Ernest Schelling, pianist and composer, has been appointed director of the Institute of Musical Art of the Juilliard Foundation, succeeding Frank Damrosch, who has retired.

Mrs. B. F. Langworthy

President, National Congress of Parents and Teachers

Calls to Order

Home Called Key to Nation

At Parent-Teacher Congress

Special to The Christian Science Monitor

ATLANTIC CITY, N. J., April 25—Dedicated to making America a better place for its people and their homes, the National Congress of Parents and Teachers, obeying its thirty-ninth annual convention today at the Ritz-Carlton Hotel, with Mrs. B. F. Langworthy, national president, and Mrs. L. K. Fetterall, national treasurer, presiding.

Approximately 800 delegates are registered.

"The home is a workshop of democracy," declared Mrs. Fetterall, "and the child is its apprentice. Every child should have a home to rich in the things that money cannot buy, a home that will be a memorial to a joyous, well-balanced childhood. More important than preparation in housekeeping is the knowledge of when to apply it."

Need of Higher Standards

"Every child deserves with the whole nation the best that we can give him. Not with one dollar spent for education as for the home is the home. And the whole nation is the parent of the child. It is impossible to have a nation rich in its homes and poor in its schools. The welfare of a nation rests on the education of its children."

Mrs. L. K. Fetterall and Mrs. Langworthy are the first and second vice-presidents, respectively, of the Florida congress, and Mrs. Simon S. Labadie, chairman of resolutions, is also a Florida resident. Mrs. W. Sumter Covey, president of the Florida congress, and Mrs. M. H. Talman, chairman of resolutions, are also from Florida.

Care in Private Home

"We have formed the habit of sending our children to the public schools. Let us not forget the obligation to the private home. Not with one dollar spent for education as for the home is the home the nation. Not will one dollar spent for education as for the home is the parent of a nation rich in its homes and poor in its schools. The welfare of a nation rests on the education of its children."

"Every will discover with me when I say that the home is the heart of the nation. Not will one dollar spent for education as for the home is the home the nation. Not will one dollar spent for education as for the home is the parent of a nation rich in its homes and poor in its schools. The welfare of a nation rests on the education of its children."

Need of Higher Standards

In part:

"Every will discover with me when I say that the home is the heart of the nation. Not will one dollar spent for education as for the home is the home the nation. THE EIGHTY SHILLING TAILORS

Proprietors PRICES TAILORS LIMITED

Their new patterns this Spring are simply marvellous

COOPER: I like that one of yours, anyway.

DICKSON: I spotted it as soon as I got inside the shop. You know how sometimes you pick out a winner first pik.

COOPER: Every so, I always like to have a good look round before deciding.

DICKSON: Thats what I did, of course.

And it was a real education in how this National Tailoring idea has got home.

COOPER: In what way?

DICKSON: In the style of their clothes, as well as the quality. Scores and scores of new patterns that in, and something really new and fresh in every one of them. You can't resist them, because they're so right, and look just that little bit ahead of the times. Not freakish, but definitely new—it's time I got a new outfit for the Spring. So, while I'm about it, you'd better come and see. I don't care what tailor you went to, you couldn't see a finer range. And I'm pretty certain you won't find better value for money.

COOPER: Well, they've certainly done you proud. But I'm not going to let you have it all your own way—it's time I was in that case, we'd better form a National Admiration society on the spot!

DICKSON: In that case, we'd perfect form a united front to tell everybody else you see. I don't care what tailor you go to, you simply must call at the Eighty Shilling Tailors.

A. B. Mann of the Department of Agriculture, Pretoria, has been awarded the first Mansfield Memorial Medal for the best thesis published during the year by a member of the Association of Economic Biologists.

The subject of the thesis is "The Biology of the Tsetse Flies of the Glossina Palpalis Group," and the medal will be presented to Mr. Mann at the annual meeting of the Association in London on May 3.

Price 25/6

Teton blue, water and white.

A limber designed for the lighter fronts, in poodle. The crossover front has a very slimming effect. The main body panel is cut-to-work in one piece to give trouble free wear and comfort. Colours—Nigger, Navy, Red, Green, beige or Black. Size 7½ ins.

P.O. 8/6

Process Is Perfected

This is the picture given by Dr. A. B. Mann of the Department of Agriculture, Pretoria, of the tsetse fly.

The existence of this fatal group was established on the illustrations that accompany the paper.

Also a Farm Problem

Besides eliminating cattle as a source of food supply, the tsetse fly makes it impossible for the settler to grow crops on land which is infested with the insect. Thus the fly is a problem to the farmer as well as to the cattle breeder.

Dr. Mann's work was carried out in the Transvaal and Northern Rhodesia.

Tsetse Fly Remains the Foe

Scientists Hope to Find Way to Control Sleeping Sickness

Despite the fact that the tsetse fly, which carries sleeping sickness, has been identified as the cause of the disease, and that the habits of the fly are known, no way has been found to control the disease, which is responsible for the death of thousands of cattle and human beings in Africa each year.

Scientists are hopeful, however, that the discovery of the cause will lead to the discovery of a cure or a method of control.

Sleeping sickness is caused by a minute parasite which is carried by the tsetse fly from infected animals to human beings. The parasite, which is known as trypanosoma gambiense, lives in the blood of the victim, and when the fly bites an infected animal or person, it sucks up the parasites with the blood. After a period of development in the fly, the parasites are injected into the blood of the next victim bitten by the fly.

Another important factor in the development of the disease is the fact that the parasite is not fatal to the animal or human being which carries it, but only to those bitten by the fly. Thus the disease is spread by healthy carriers.

Scientists have found that the tsetse fly is attracted by the odor of animals, and that it is also attracted by moving objects. Experiments have been made with the fly in a cage, and it has been found that it will follow a moving object for a distance of 100 yards.

Experiments have also been made with the fly in a wind tunnel, and it has been found that it will fly against a wind of 11 miles an hour

The Omnipotence of Divine Law

Written for The Christian Science Monitor

WHAT a wonderfully comforting fact it is to realize that there is no mix-up in God's universe, that it truly represents one harmonious, unbroken, perfect whole, that not one part of it can be removed or destroyed, that it is not dependent upon any material sense for its existence, that it is not subject to the laws of matter, that it is not governed by the laws of chance, that it is not a result of evolution, that it is not a result of anything! It is the direct outcome of Mind, of God, and as such it is perfect, eternal, and changeless. It is the reflection of Mind, and as such it is spiritual, intelligent, and immortal. It is the expression of Life, and as such it is free, joyous, and boundless. It is the manifestation of Love, and as such it is tender, compassionate, and all-inclusive. It is the evidence of Truth, and as such it is unerring, absolute, and unchangeable. It is the idea of Principle, and as such it is scientific, logical, and demonstrable. It is the law of Spirit, and as such it is supreme, omnipotent, and omnipresent.

All these facts I have made, I can repeat, and I am very thankful that I have them to make use of in my daily life. But I have also been thankful for the fact that I have not had to make them, that they are not dependent upon me, that they are not my responsibility, that they are not subject to my limitations, that they are not governed by my mistakes, that they are not affected by my sins, that they are not influenced by my shortcomings, that they are not hampered by my inadequacy, that they are not interfered with by my ignorance, that they are not obstructed by my blindness, that they are not impeded by my deafness, that they are not crippled by my lameness, that they are not paralyzed by my weakness, that they are not destroyed by my death. They are God's universe, and I have simply to accept it as it is, to understand it as it is, to love it as it is, to live it as it is, to express it as it is, to demonstrate it as it is, to rejoice in it as it is, to be grateful for it as it is, to be glad of it as it is, to be thankful for it as it is, to be happy in it as it is, to be blessed by it as it is, to be saved by it as it is, to be healed by it as it is, to be redeemed by it as it is, to be sanctified by it as it is, to be glorified by it as it is, to be perfected by it as it is, to be immortalized by it as it is, to be eternalized by it as it is, to be infinitized by it as it is, to be omnipotentized by it as it is, to be omnipresentized by it as it is, to be omniscientized by it as it is, to be divinized by it as it is, to be spiritualized by it as it is, to be Christianized by it as it is, to be Godized by it as it is, to be Mind-ized by it as it is, to be Truth-ized by it as it is, to be Life-ized by it as it is, to be Love-ized by it as it is, to be Principle-ized by it as it is, to be Soul-ized by it as it is, to be Spirit-ized by it as it is, to be Science-ized by it as it is, to be Reality-ized by it as it is, to be Perfection-ized by it as it is, to be Eternity-ized by it as it is, to be Infinity-ized by it as it is, to be Omnipotence-ized by it as it is, to be Omnipresence-ized by it as it is, to be Omniscience-ized by it as it is, to be Divinity-ized by it as it is, to be Spirituality-ized by it as it is, to be Christianity-ized by it as it is, to be Godliness-ized by it as it is, to be Mindfulness-ized by it as it is, to be Truthfulness-ized by it as it is, to be Lifefulness-ized by it as it is, to be Loveliness-ized by it as it is, to be Principleness-ized by it as it is, to be Soulfulness-ized by it as it is, to be Spiritualness-ized by it as it is, to be Scientificness-ized by it as it is, to be Realityness-ized by it as it is, to be Perfectness-ized by it as it is, to be Eternalness-ized by it as it is, to be Infinitness-ized by it as it is, to be Omnipotentness-ized by it as it is, to be Omnipresentness-ized by it as it is, to be Omniscientness-ized by it as it is, to be Divinityness-ized by it as it is, to be Spiritualness-ized by it as it is, to be Christianness

Business Recovery, Bank Says

Only Answer to Unemployment Is Found Upon It—Confidence a Requisite

Special from Monitor Financial Bureau

NEW YORK, April 25—Re-employment is the main objective of the nation's efforts to bring about recovery from the depression, according to a pamphlet issued today by the National City Bank of New York.

"Unemployment is a direct reflection of the state of business," the pamphlet says. "Business cannot be revived by any artificial means. Its recovery depends upon the restoration of confidence. Confidence depends upon the ability of business to earn profits. Profits depend upon the ability of business to sell its goods or services at prices which will yield a profit. Prices depend upon the relation between supply and demand. Demand depends upon the ability of the consumer to buy. Ability to buy depends upon employment. Employment depends upon business. Business depends upon confidence. And confidence depends upon profits. And so the circle is complete."

"But the problem of recovery is not so simple as that statement would indicate. Many factors enter into the situation, and they are all interdependent. Agriculture, for example, is the largest single industry in the country. Its well-being depends upon the purchasing power of the farmer. The farmer's purchasing power depends upon the prices he receives for his products. Prices depend upon the relation between supply and demand. Supply depends upon the acreage planted and the weather. Demand depends upon the ability of the consumer to buy. Ability to buy depends upon employment. Employment depends upon business. Business depends upon confidence. And confidence depends upon profits. And so the circle is complete."

"Government competition not only destroys private initiative, but also destroys the ability of private industry to pay taxes. Government expenditures must be financed by taxation or by borrowing. Taxation is a burden on business and industry. Borrowing competes with private industry for the available supply of capital. Government competition with private business is therefore a deterrent to recovery. Government activity in the field of relief, public works, and the like, is a palliative, not a cure. It is a temporary expedient, not a permanent solution. Only business can provide employment, and business can do so only when it is profitable."

"Government competition not only destroys private initiative, but also destroys the ability of private industry to pay taxes. Government expenditures must be financed by taxation or by borrowing. Taxation is a burden on business and industry. Borrowing competes with private industry for the available supply of capital. Government activity in the field of relief, public works, and the like, is a palliative, not a cure. It is a temporary expedient, not a permanent solution. Only business can provide employment, and business can do so only when it is profitable."

"Unemployment is the main objective of efforts to bring about recovery from the depression. Unemployment is the result of a number of causes, but the principal cause is the inability of business to earn profits. Profits depend upon the ability of business to sell its goods or services at prices which will yield a profit. Prices depend upon the relation between supply and demand. Demand depends upon the ability of the consumer to buy. Ability to buy depends upon employment. Employment depends upon business. Business depends upon confidence.
